OUR ETHOS

Founded in Beirut (2024), Labaki Studio draws inspiration from a principle expressed by Massimo Vignelli: **Design is One**.

Design is understood as a process rather than an outcome. It begins with understanding people, their needs, stories, desires and ways of interacting with the world, then translates those insights into thoughtful experiences.

In keeping with this philosophy, the studio is fundamentally **multidisciplinary**, working across different fields of design. It is a place of both **mastery and experimentation,** where every detail is treated with care.

At its core, it is committed to design that **is ethical, thoughtful, meaningful and, above all, human.**

CONTENTS

OUR SERVICES

(WHAT WE DO)

The Studio brings together three fields of design, each with its own scope and possibilities. The following pages detail the services offered, from concept to production.

Industrial & Space Design

- Bespoke Products
- Custom Furniture
- Interactive Pop-Ups
- Scenography

INDUSTRIAL & SPACE DESIGN

Bespoke Products

Designing bespoke **products and objects**, developing each piece from concept to production with a focus on story, function, materials and manufacture.

Custom Furniture

Creating **custom furniture** for private use, public spaces. From individual pieces to collections, tailored to specific needs, desires and environments.

Interactive Pop-Ups

Setting up **temporary spaces and installations** for exhibitions, and brand activations, creating opportunities for public interaction, participation and discovery.

Scenography

Developing displays for exhibitions, performances, events and retail, shaping how artworks, performances and products are presented and experienced.

CONTENTS

PROJECT STRUCTURE

(HOW WE BUILD)

Each project begins with an understanding of its brief, objectives, and specific needs.

Based on these, the work is split into components: an **Essential** Package, **Extension** Packages, and **Add-Ons**.

This structure helps organise deliverables, establish a timeline, and determine project pricing.

PROJECT STRUCTURES

(HOW WE BUILD)

Essential Package

The **starting point** of every project, covering the **core research, concept development, and design work**.

It establishes the creative direction and provides the **primary deliverables** upon which the project can develop.

+

Extension Packages

Extensions expand the scope with **technical development, prototyping, or production.**

They adapt and apply the work across different formats, applications, and contexts - physical or digital.

+

Add-On Services

Add-Ons complement the main packages by addressing specific needs that require further personalisation, or specialised work.

CONTENTS

INDUSTRIAL & SPACE DESIGN

(PACKAGES BREAKDOWN)

Essential Package

Product
Creative Research
Concept Development
Design Proposal
Renders / Visualisations

Temporary Space
Creative Research
Concept Development
Design Proposal
Renders / Visualisations

Scenography

Fabrication & Production Coordination
Quality Control & Production Follow-Up

Packaging Execution
Prototypes
Printing Preparation
Production Coordination

Product Naming

Product Copywriting

Art Direction & Photoshoots
Moodboard & Storyboard
Photoshoot Planning & Direction
Images for Website & Socials

CONTENTS

OUR FOCUS

(INDUSTRIES WE SERVE)

Food & Beverage

Hospitality, restaurants, bars, culinary concepts, artisanal production, F&B brands.

Arts & Culture

Museums, cultural institutions, exhibitions, publications and creative initiatives.

Entertainment & Events

Music bands, film, performing arts, festivals, celebrations and audiovisual experiences.

Our practice is driven by storytelling and experimentation, favouring projects that allow for originality and expression, making it less suited to corporate and institutional work, particularly in finance, healthcare and large-scale industry.

CONTENTS

ABOUT THE FOUNDER

José Labaki is a designer and founder of Labaki Studio (2024).

Driven by a passion for design in all its forms, his practice spans visual identities, objects and spaces, with a particular interest in the connections between design and culture.

Through creative research, he explores human behaviour and communication, developing original methods to challenge assumptions and uncover unexpected connections.

He is particularly fascinated by the expressive power of design, and how subtle changes in shapes, lines and proportions can transform meaning and perception.
From 2019 to 2026, he taught design methodology and interaction at the Lebanese Academy of Fine Arts (ALBA), an experience that continues to inform his approach.

His work combines thoughtful research with creative experimentation, guided by the belief that meaningful design begins with understanding and expressing human needs, desires and stories.
